FTTA Fiber Cable Assembly
2xLCC – 9uG657 – 2xLCC

FB-L98B-089-XXX

All dimensions are in mm; tolerances according to ISO 2768 m-H

Description

This 4 fiber optic jumper cable assembly connects remote radio heads (RRU) in telecommunication applications. Each side of the jumper cable assembly is equipped with 2 LC-Compact connectors. The connectors on top end (A Side) are overmolded, the connectors on bottom end (B side) comes with standard boots.

Divider on top end (A Side) is made in hotmelt technology and especially designed for solid straight connections. Divider at bottom end (B side) is done with a heat shrink.

The top end (A Side) is using 7mm fan-outs, the bottom end (B side) is using 2.9mm fan-out.

Each fanout of the Top end (A side) is equipped with a Rosenberger Fiber Enclosure (RFE). The RFE is a watertight and UV resistant enclosure for various connectors, like fiber optic, data, power...

It is a snap on system for easy, secure and reliable installation.

This assembly could be used indoor and outdoor. The cable is UV protected and flame retardant.
