| <div>Description</div> <p><b>Rosenberger Fiber Distribution Enclosure for 18 Channel System (Accommodates 18 Pair Fiber)</b></p> <p>The Rosenberger Site Solutions Fiber Distribution Enclosure is used for fiber management at top or bottom of towers. The enclosure provides connectivity of the Fiber Trunk Cable to the associated Fiber Jumpers. These jumpers then attach to the Remote Radio Units (RRU) or equipment.</p> <p>The sturdy enclosure provides water and dust proof protection to fiber connections. Included mounting hardware eases attachment of the enclosure to many typical installation options.</p> |                                                                                                                                                                                                                       |
